### How results are calculated:

Essentially, we rank teams by who got the furthest the fastest, while not perfect when CPs are skipped it is the most accurate measure we have. We use the following rules to implement the results.

If the CP had a time penalty associated with it, then you only receive the time penalty for missing the CP and are still on the "full" course.

If the CP didn't have a specified time penalty, then by missing or skipping it you are on an "alternate or short" course option, ranked behind teams that did reach it.

A couple teams who were going to miss the cut-off at CP27 took Onion Creek to make the cut-off, we have issued a 2 hour time penalty for this.
